DIGITAL DISPLAYS PRODUCT GUIDE

ABOUT SLIMLINE WAREHOUSE

100% ONLINE

For over 25 years, **Slimline Warehouse** has been a trusted leader in providing display solutions for businesses across Australia.

We're known for delivering high-quality, reliable products designed to enhance your brand's visibility and drive results.

We're a real warehouse, and we're 100% online. We don't have the expenses of showrooms and shopfronts like some other display suppliers, and our prices reflect that.

We keep costs low and stay focused on delivering you the best products and the best online shopping experience possible.

We buy in bulk and keep our prices low. Always. The result is that you save money, and we free up warehouse space for more stock – it's a win-win! Of course, shop around and compare prices, but you'll find us hard to beat.

Contact our sales team today for expert advice on our standard or bespoke products, to discuss how we can assist your business, or to arrange a meeting.

- Available with Android and Windows operating system.

Dline – its your complete end to end software and hardware solution.

Dline DIGITAL SOLUTIONS

FREESTANDING TOTEMS

ELEVATE DIGITAL ADVERTISING

Create sophisticated, eye-catching promotional displays with a Digital Display Totem. It offers the perfect way to give your messages maximum impact, especially in environments where a standard sign might be overlooked. This makes it a popular choice for department stores, lobbies, and hotels.

Click here for full pricing and specifications

PRODUCT FEATURES

Multimedia displays. This multipurpose digital display supports images, videos, slideshows and audio to help your messages stand out.

Full HD panel. Choose from a 32", 43" or 55" TFT LCD panel display. This bright 400cd/m2 screen has a full HD 1920 x 1080 resolution and 1200:1 contrast ratio to ensure your graphics stand out, delivering clear, crisp images.

Add bespoke branding. Available with optional bespoke branding to reinforce your messaging and increase brand awareness.

Internal speakers. Two built-in speakers let you play music, video or other audio to further increase the chances of your message being noticed.

Media looping function. Settings on the Digital Display Totem allow you to set timers and loop your presentations.
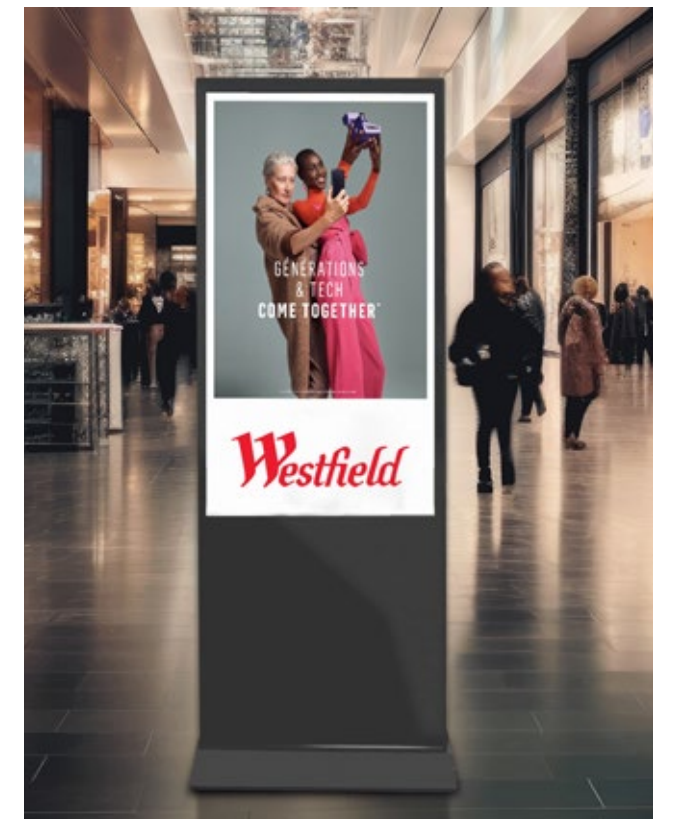

Indoor use only. The Display Totem is mains powered, so it must be placed with access to a standard power-point.

Easy to manoeuvre. Choose to add braking wheels to the base of your unit to make it easier for you to move around your business when required.

Split-screen function. The Totem can display images and videos simultaneously, thanks to its clever split-screen function.

Upload from USB. Insert a USB stick containing your files into the rear of the totem to transfer them onto the built-in storage. Your displays will play in a continuous loop.

Android operating system. Powered by the Android® 11 OS for efficiency and compatibility with a wide variety of Apps and media file types.

Wi-Fi connection. You can use the Wi-Fi capabilities to upload content via mobile app. Control the system using the supplied remote.

Automatic on/off timer. Set a timer so your displays only play during specified hours.

COMMERCIAL SCREENS

ENGAGE, INFORM & IMPRESS

Transform how your business communicates with customers using high-impact commercial screens. Designed for 24/7 performance, these professional grade displays offer vibrant visuals, reliable operation, and sleek presentation – ideal for retail, hospitality, healthcare, and corporate environments.

Whether you're promoting products, sharing live content, or guiding customers, digital signage helps you stand out, stay current, and drive engagement. Easy to update and scale, it's the smart solution for modern, dynamic messaging that gets noticed.

Multimedia displays. This multipurpose digital display supports images, videos, slideshows and audio to help your messages stand out.

Full HD panel. Choose from a large range of sizes, from 32" through to 105" TFT LCD panel displays. This bright 400cd/m2 screen has a full HD 1920 x 1080 resolution and 1200:1 contrast ratio to ensure your graphics stand out, delivering clear, crisp images.

Internal speakers. Two built-in speakers let you play music, video or other audio to further increase the chances of your message being noticed.

Media looping function. Settings on the Commercial Screens allow you to set timers and loop your presentations.

Upload from USB. Insert a USB stick containing your files into the rear of the totem to transfer them onto the built-in storage. Your displays will play in a continuous loop.

Android operating system. Powered by the Android® 11 OS for efficiency and compatibility with a wide variety of Apps and media file types.

Slimline design. These screens have a sleek, slimline construction with a stylish frame. It provides a contemporary look, while also saving on floor space.

Split-screen function. The screen can display images and videos simultaneously, thanks to its clever split-screen function.

Wi-Fi connection. You can use the Wi-Fi capabilities to upload content via mobile app. Control the system using the supplied remote.

Automatic on/off timer. Set a timer so your displays only play during specified hours.

DIGITAL SIGNAGE APPLICATIONS

ADVERTISING	BANKING & FINANCIAL	CORPORATE
CINEMA & THEATERS	EDUCATION	FOOD & BEVERAGE
HOTELS & HOSPITALITY	HEALTHCARE	RETAIL STORES
SHOPPING CENTRES	SPORT VENUES	TRANSPORT

ENHANCE THE SHOPPING EXPERIENCE

Digital advertising screens are extremely versatile, as they allow users to change their displays instantly.

Advertising isn't just about persuading the customer to buy a specific product. Using digital signage can affect your customer's or visitor's mood and perception of their surroundings.
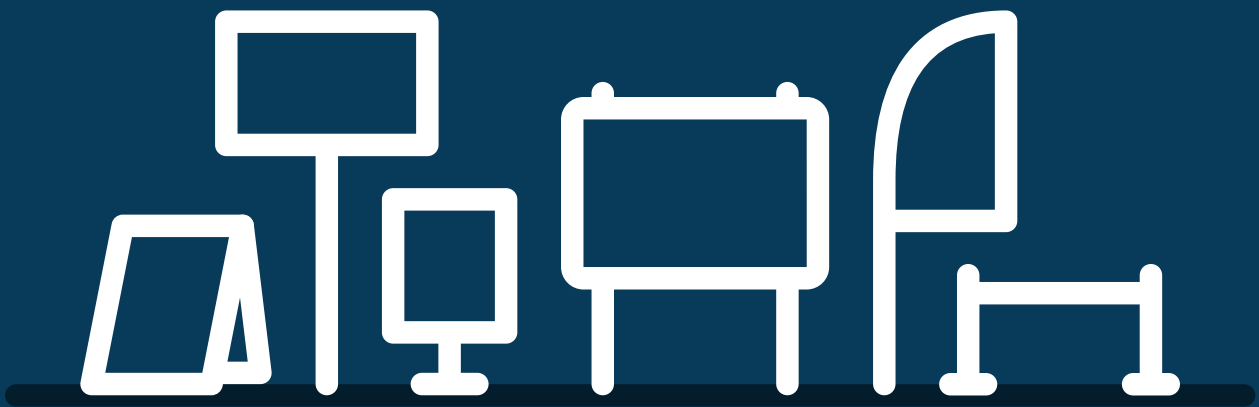

The use of digital signage as an atmospheric tool has been found to be highly effective. Digital screens can significantly impact shopper emotions, enhancing their perception of the environment and increasing their spending.

Digital signage that evokes emotion can have a positive effect on customers, and improve their mood. This can lead to more impulse buys, and increase customer loyalty.

Attractive digital displays, such as colourful images or video, help to eliminate the display blindness effect, gaining more attention than traditional printed signs. Furthermore, interactive touchscreen-based signs give a better user experience by involving the audience.

Get in touch to find out how we can make a difference to your business by making your brand visually outstanding to add wheels and branding.
