

Now that you know your way around the CMS, let's connect a screen.

Step 1: Install the Fusion Signage Player onto your screen(s).

Have an Android compatible device?

OPTION 1

Does your Android device have Google Play?

1. Open Google Play on your device and search for 'Fusion Signage' and install it.
2. Once installed, open Fusion Signage

OPTION 2

No Google Play? Install the APK

Device Specific instructions:

[Phillips Screens](#) | [Minix Players / Media Boxes](#)

General Instructions:

1. [Download the APK \(Android Application\)](#).
2. Put the APK onto a USB
3. Plug the USB into your Android device
4. Navigate to the USB in your Android file explorer.
5. Touch/Click on the APK and follow the installation instructions.
6. Once installed, open Fusion Signage

Have a Windows/Linux/Mac device with Google Chrome installed? (BETA)

1. Open the Fusion Web Player url in Google Chrome on the device. <https://player.fusionsignage.com.au>
2. The Fusion Web Player works even if you lose your internet connection!

Step 2: Link your screen to your CMS account.

- 1. Note down the **identity** code that shows on your newly installed screen. If there is no identity ensure that your device has an internet connection.
- 2. Go to the screens page and click the Add Screen Button
- 3. Enter the **identity** code into the input box.
- 4. Give the screen a name and assign a licence.
- 5. You now have your screen linked to your account!
