WIPEHLD2
Wipes / Sanitiser Holder

1. Follow the instructions below to mount the back piece to the wall or to a stand using the included hardware.

   Mount to Wall
   To mount to the wall, drill two small pilot holes into the wall, aligned with the holes in the back piece. Using a Phillips-head screw driver, insert the screws into the pilot holes and tighten. Leave a bit of space between the wall and the head of the screw. Take the back piece of the unit and slide and lock it onto the screws. Tighten down the screws so they securely hold the back piece onto the wall.

   Mount to Stand
   To mount to a stand thread a square nut onto a screw and hook it into the bottom keyhole slot in the back piece. Slide the square nut (still attached to the back piece) into the slot in the stand. Attach the second screw and square nut onto the top keyhole in the back piece and slide it into the stand. Tighten both screws so the back piece is securely placed in the desired location on the stand.

2. Place wipes or hand sanitiser inside the bottom of the unit.

3. Then, place the top over the container. Use the included hardware to secyre the top and bottom.

4. Adjust for height and tighten screws.
