

# Installing the ashtray

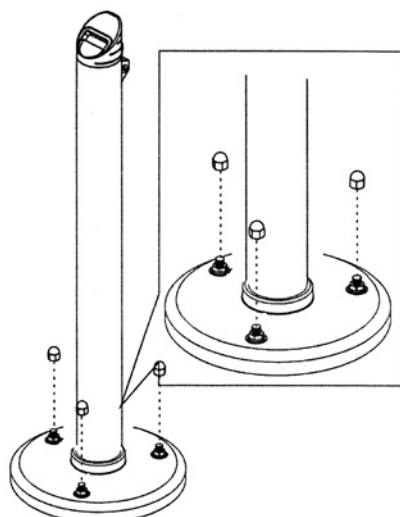

1. Mark the position of the holes on the ground. Drill the holes in using an impact drill.

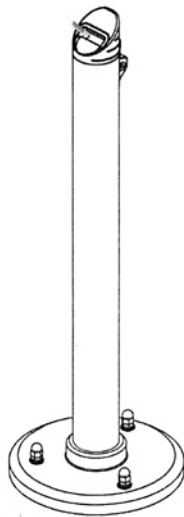

2. Knock the dynabolts into the ground until the flange is flush in the ground.

3. Put the ashtray onto the dynabolts. Screw the nuts onto the dynabolts.

4. Tighten the nuts using the spanner

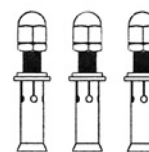

5. Unit is ready

brush

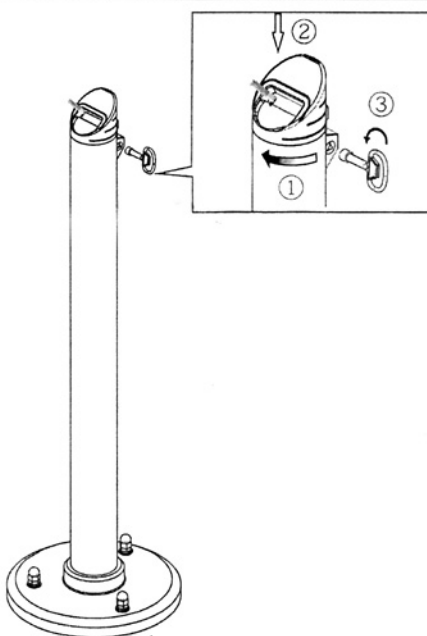

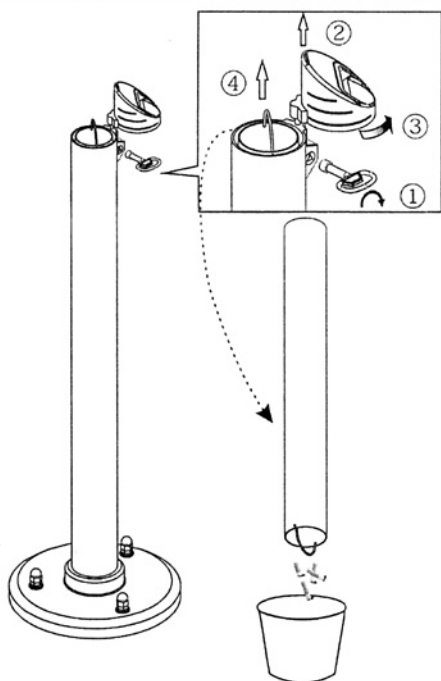

key

dynabolts

**Hardware Provided**

## Cleaning & Maintenance advice

(1). Unlock the ashtray using key provided.

(2)(3). Lift the top cap up and spin it around.

(4). Lift the cannister out using the handle. Invert the cannister to empty the ashtray

It is recommended to empty the ashtray frequently. Use the cleaning brush provided to keep the bottom lid clean.

Clean the ashtray with damp cloth soaked in mild soap and wipe dry.

Reverse the steps to prepare ashtray for use.
